

## ZAWÓR ZWROTNY V-363

### CHARAKTERYSTYKA:

|             |   |   |
|-------------|---|---|
| Średnica    | - | 15 -200 mm;   |
| Ciśnienie   | - | 63 bar;   |
| Temperatura | - | do 560°C (dla uszczelnienia miękkiego ≤ 200°C);   |
| Medium      | - | woda, para wodna i inne neutralne ciekłe i gazowe substancje, a także paliwa ropopochodne, gazy ziemne. |

### WYKONANIE: typ / przyłącza / materiał kadłuba / rodzaj grzyba i pierścienia grzyba / inne

Przykład: V-363 / --- / --- / --- / ---

Przykład: V-363 / S / U / P / ---

| Przyłącza             | Znak | Materiał kadłuba         | Znak | Rodzaj grzyba i pierścienia grzyba | Znak | Inne  | Znak |
|-----------------------|------|--------------------------|------|------------------------------------|------|-------|------|
| Kołnierze             | ---  | (P250GH) C22.8           | ---  | Standardowy                        | ---  | ----- | ---  |
| Do spawania           | S    | lub GP240GH              | ---  | Pierścień z PTFE                   | P    |       |      |
| Do spawania           | SW   | 16Mo3 lub G20Mo5         | U    | Pierścień z NBR                    | N    |       |      |
| Z wewnętrznym gwintem | G    | 13CrMo4-5 lub G17CrMo5-5 | A    | Pierścień STELLIT                  | L    |       |      |

### ZASTOSOWANIE:

Zawory zwrotne przeznaczone są do ochrony rurociągu przed strumieniem powrotnym czynnika roboczego.
